 Lab Instructor
 Instituted Lab Program, Equipment and Supply Acquisition, Repair and Maintenance
 Instruction, Motivation, Appraisals, and Records
 Left to apply acquired knowledge

Plus 15 Years Experience as Mechanic and Millwright

Education

I have 8 years of post high school education. About half is formal academic classroom instruction at colleges and universities and the other half is specific vocational training.

My **diversified** education has been **distributed** throughout my career. I generally acquire specific training and then apply the new skills and knowledge on the job.

I initiated my basic studies at Florida State University before focusing on aircraft maintenance. I took some machine shop classes before working as an industrial millwright. My experience with missile systems prompted further schooling to study electronics. The expanding demand for my services in the process control industry indicated a need for business training to fully utilize my capabilities.

Ventura Community College, Associate Of Science Degree In Business Management / 1994'
 GPA in major 4.0 / overall GPA 3.9

Various Vendor Schools, For Control System Equipment & Computer Networking

Golden State School, Electronic Technician Training

Finished at top of the class and completed third party testing as certified electronic technician.
 Was hired by school after graduation to setup and run lab program.
